www.linkedin.com/in/uday-abhishek

Senior iOS Engineer with 12+ years of overall experience, including 9+ years in iOS application development, building scalable and high-performance mobile applications using Swift, SwiftUI, UIKit, and Combine. Proven track record of improving app performance, enhancing user engagement, and delivering production-grade applications.

Strong expertise in MVVM/Clean architecture, performance optimization, and end-to-end feature ownership. Experienced in mentoring developers and collaborating with cross-functional teams to deliver impactful products.

SKILLS

- Swift
- Swift Concurrency
- REST API
- UIKit
- Agile Methodology
- Core Data
- XCode
- Fastlane
- Mobile Application Development
- Swift UI
- Design Patterns
- XCTest
- MVVM Clean Architecture
- Cocoapods
- Alamofire
- Apple's Human Interface Guidelines
- GCD
- Combine
- GIT
- async/await
- VIPER
- SPM
- iOS Development
- Swiftlint
- SQLite

CERTIFICATION

- Certificate of completion: Introduction to Claude Cowork
- Introduction to Generative AI
- Introduction to Large Language Models

WORK EXPERIENCE

Senior Consultant - Wipro Technologies

Dec 2015 - Aug 2025

- Led development of iOS applications (Swift, SwiftUI, UIKit) improving user engagement by 35%
- Designed modular architecture (MVVM/Clean), improving scalability and reducing technical debt by 25%.
- Improved app performance: 30% faster launch time, 99.3% crash-free sessions
- Built reactive features using Combine, enhancing real-time user experience
- Implemented CI/CD pipelines (Fastlane), reducing release effort and improving delivery speed
- Collaborated with product, backend, and design teams in Agile environment
- Mentored developers and improved code quality through structured reviews
- Owned full lifecycle: development → testing → App Store release

Technologist - Shiksha Infotech

Nov 2014 - Dec 2015

- Built hybrid mobile apps (Cordova) improving delivery speed
- Integrated REST APIs and improved app performance by 25%
- Developed responsive UI for multi-device compatibility

Software Developer - Ensign Pixels LLP

Oct 2012 - Nov 2014

- Utilized vanilla JavaScript to consume RESTful APIs and efficiently parse JSON data for dynamic web applications
- Developed responsive, intuitive user interfaces leveraging HTML5, CSS3, and Bootstrap framework to enhance user

experience

- Optimized front-end performance and cross-browser compatibility for seamless accessibility across devices

PROJECTS

Space App

26 Months

- Developed and launched mobile applications for multiple associated brands, targeting diverse regional markets to drive market penetration
- Customized app features to address specific regional requirements, increasing user engagement by 30% and boosting retention rates
- Collaborated with cross-functional teams including marketing, design, and development to ensure consistent brand representation
- Ensured seamless and intuitive user experience across global platforms, enhancing customer satisfaction and brand loyalty

HSBC Banking App

24 Months

- Designed and developed a UK-specific banking application to optimize B2B transaction workflows
- Implemented robust security protocols and compliance measures to ensure secure transaction management for business clients
- Enhanced user experience by integrating region-specific regulatory compliance and advanced security features, improving client satisfaction by 15%

AutoInsights

36 Months

- Developed an application that displays analyzed data acquired from OBD devices, enhancing real-time vehicle monitoring and diagnostics.
- Visualized key insights including Trip Details, Nearby Places, Vehicle Health, Geo-fencing, and Risk Analysis to support informed decision-making.
- Improved user engagement through a comprehensive dashboard integrating multiple telematics data points.
- Published the app on the App Store, increasing accessibility and user adoption: <https://apps.apple.com/us/app/wipro-autoinsights/id1281864911>

Mahindra KonnectFirst

15 Months

- Developed a data visualization application leveraging analyzed OBD device data to deliver critical insights, including trip analytics, nearby locations, vehicle health status, geofencing alerts, and risk assessment.
- Designed and implemented real-time monitoring features, enhancing operational safety and enabling timely decision-making for vehicle management.
- Published and continuously maintained the application on the App Store, achieving increased user engagement and improving accessibility: <https://apps.apple.com/us/app/wipro-autoinsights/id1281864911>

Vodafone

15 Months

- Developed a mobile application for networking hardware installation and maintenance engineers to efficiently track issue and fault reports.
- Enabled real-time logging and monitoring of hardware faults at various locations, improving issue resolution time by an estimated 20%.
- Facilitated systematic documentation of network equipment status to enhance maintenance workflows and reporting accuracy.

EDUCATION

2011 B.Tech/B.E. | Computer Science and Engineering
(CSE)
VTU, Belgaum
